

MSHA TRAINING THAT STANDS UP IN THE FIELD

Practical, field-based MSHA training delivered by a former Arizona State Mine Inspector with experience in surface mining, underground mining, mine rescue, and instructor development.

Training is delivered under an MSHA-approved training plan with an emphasis on regulatory accuracy, practical application, and operational competence that extends beyond minimum compliance requirements.

Every course is built around real mining operations, helping miners recognize hazards, make better operational decisions, and apply what they learn where it matters most—in the field.

JODY MARTINEZ

**Former Arizona State Mine Inspector |
MSHA Blue Card Instructor**

Training Delivered Under an MSHA-Approved Training Plan

MSHA INSTRUCTOR ENDORSEMENTS

IS – Surface • IU – Underground
